

# CRICKET

Advantage Sports & Leisure have the latest products and knowledge to design, construct or re-surface your cricket facilities. From multiple bay cricket practise nets to centre cricket wickets our product will suit all levels and abilities.

## SYNTHETIC GRASS

### Advantage Test 9

Advantage Test 9 has been developed after extensive research and has been specifically designed for cricket. It is a heavy duty, double-backed product designed for our harsh range of climatic conditions with the highest level of UV stabilisation available. Advantage Test 9 is the ideal product for practise cricket nets, centre wickets and indoor cricket.

### Supergrasse

Supergrasse is a 9mm product with the appearance of a natural turf wicket. The two tone yarn of green and barge gives the wicket a more natural look allowing the batter and bowler to feel more at home when at the crease.

### Centurion Cricket Wicket

The Centurion Cricket Wicket is made from 100% recycled PET drink bottles. Structured as a non-directional, durable monofilament yarn it is expected to last up to 50% longer. It also adds the benefits of a natural wicket appearance, which helps the batter keep their eye in before the game.

### Rebound Ace Cricket

The new Rebound Ace Cricket wicket has turf-like qualities. It prepares both batsmen and bowlers for a game, as it offers a more natural bounce. The product is constructed from multiple layers including a 4mm underlay mat. Not being a synthetic grass, it also allows play to continue in wet weather as the product has a seamless sealed surface.
