About POLYTRAK systems

Full Pour system

POLYTRAK Full pour system is a high performance system designed to meet the most exacting standards of international competition to IAAF regulations. Cast in place with two layers of SBR rubber mixed with 50% elastic polyurethane flood coat and finished with a topping of coloured EPDM granules broadcast onto the polyurethane compound.

Sandwich system

POLYTRAK Sandwich system provides good force reduction and is constructed on a cast in place base mat of rubber crumb applied with clear polyurethane binder. The base layer is sealed with a combination of micronised rubber and polyurethane, with a final topping of coloured EPDM granules broadcast onto a flood coat of polyurethane compound.
